

PRACTICAL / BUSINESS-STYLE QUESTIONS

1. Supermarket Billing System

Problem (Explain like this)

“Aap ek supermarket me billing system bana rahe ho.

User baar-baar item price enter karega.

Agar user 0 enter kare → billing stop ho jaye.

Kuch rules:

- Negative price skip karo
- Total bill calculate karo”

Concepts Used:

- Loop (continuous input)
 - break → stop billing
 - continue → skip invalid input
-

2. ATM Withdrawal System

Problem

“User ATM se paise withdraw kar raha hai.

System bar-bar amount poochega:

- Agar balance se zyada amount → reject
- Agar valid hai → deduct karo
- Agar user 0 enter kare → exit”

Concepts:

- Loop
- break (exit)
- Conditions

3. Login System (Limited Attempts)

Problem

“Ek login system banao jahan user ko 3 attempts milte hain

- Correct username/password → login success
 - Wrong → retry
 - 3 attempts ke baad → block”
-

 Concepts:

- Loop
 - break (login success)
 - Counter logic
-
-

4. Student Marks Analyzer

 Problem

“Teacher multiple students ke marks enter karega

Rules:

- Negative marks skip karo
 - Marks 0 ho → input stop
 - Average calculate karo”
-

 Concepts:

- Loop
 - continue (skip invalid marks)
 - break (stop input)
-
-

5. Traffic Control System

Problem

“Traffic system numbers monitor kar raha hai

- Agar vehicle number = VIP → stop checking
 - Agar invalid number → skip
 - Baaki sab print karo”
-

Concepts:

- break (VIP detected)
 - continue (invalid skip)
-

6. Factory Quality Check

Problem

“Factory me products check ho rahe hain

- Agar defective item mile → ignore (skip)
 - Agar dangerous item mile → stop system
 - Baaki count karo”
-

Concepts:

- continue → defective skip
- break → dangerous stop

7. Call Center System

Problem

“Call center me calls aa rahe hain

- Har call ka duration enter karo
 - Agar duration 0 ho → system band
 - Agar duration negative ho → ignore
 - Count total valid calls”
-

Concepts:

- Loop
- continue
- break
- Counter

8. Hospital Patient Queue

Problem

“Patients queue me aa rahe hain

- Har patient ka age input lo
- Agar age < 0 → skip
- Agar emergency patient (age > 80) → stop system and handle immediately
- Count total patients”

 Concepts:

- Loop
- continue
- break
- Real-life priority logic

QUESTIONS FOR 'FOR' LOOP

Q1) Count how many numbers are divisible by 5 (1–100)

Q2) Print squares of numbers from 1 to 10

Q3) Reverse counting (100 to 1)
